PROFILE

I am a technical leader, including developing software and open specifications for the 3D geospatial platform. My interest is computer graphics, especially physically based rendering, virtual earth, and differentiable rendering. Outside of the rendering world, I am a father, runner, and technical writer.

EMPLOYMENT

Architect/Engineer, R&D Department, SuperMap, Beijing/Chengdu, China

Jul. 2006 - Now

- 3D GIS: I am working on real-time rendering and WebGL, striving to constantly improve the visual quality and performance. My responsibilities include spatial 3D model specifications (terrain, oblique photography, point cloud, BIM. etc.), LOD scheduling, rendering (PBR material, shadow, post processing etc.), and GPU/CPU optimization.
- Map Module: I worked on the map module, including styled vector, text rendering, anti-aliasing, and cross-platform capability (Windows, Linux, Android, Unix).
